Hello 🙋

I'm a multidisciplinary designer with over **15 years of experience** in advertising. I studied at the **Ontario College of Art & Design**, where I focused on packaging, editorial and branding.

Over the years, I've developed a broad skill set that includes **web design, HTML5/JavaScript banner development, and both 2D and 3D motion graphics** for online video, broadcast, and social media campaigns.

My portfolio spans a wide range of industries from education, finance to food & beverage and the arts. I've had the opportunity to work with leading brands such as: **University of Toronto, Yellowtail Wine, Keurig Dr. Pepper, the Art Gallery of Ontario, and Sheridan College.**

Most recently, I transitioned from agency life into the fintech space. I currently work at **Wave Financial**, where I focus on product demo animations and paid advertising content (video and static).

Technical Skills & Tools:

- **Figma**
- **Adobe Creative Suite** (Photoshop, Illustrator, InDesign)
- **Adobe After Effects & Premiere Pro**
- **Blender** (3D modeling, animation, rendering)
- **HTML5/JavaScript** banner coding and deployment via Google and other ad servers

I love to experiment with new animation techniques, discover new software and apply what I've learned to daily client work, or personal work wherever I can.

Please feel free to visit my online portfolio below:
